

Q-1:-> What is Java?

Ans:-> Java is a high-level, object-oriented programming language developed by some microsystems and now owned by Oracle Corporation. It is used to develop web, desktop, mobile.

Feature of Java:-

- 1.] Simple:-> Easy to learn and use.
- 2.] Object oriented:-> Based on objects and classes.
- 3.] Platform Independent:- Run on any operating system.
- 4.] Secure:- Provides security ~~features~~ features.
- 5.] Robust:- Strong memory management.
- 6.] Portable:- Programs can run on different devices.
- 7.] High performance:- Uses Just-In-Time (JIT).

Why Java is Platform Independent
Because Java programs are converted into bytecode which can run on any system that has a JVM installed.

Java Principle = "write once, Run any where (WORA)"

Q Difference's

Feature	JVM	JRE	JDK
Full form	Java Virtual Machine	Java Runtime Environment	Java Development Kit.
Purpose	Runs Java bytecode	Runs Java applications	Develop and runs Java programs
Contains	Execution Engine	JVM + Libraries	JRE + Development tools.
used by	End users	End users	Programmers / Developers.

Program 1:- First Java program.

class FirstProgram {

public static void main(String[] args)

System.out.println("Welcome to Java Programming");

}

Program 2:- Personal Introduction

```
class personalIntroduction {  
    public static void main(String[] args) {  
        String name = "Hashi";  
        int age = 10;  
        String college = "ABES Eng. College";  
        System.out.println("Name" + name);  
        System.out.println("Age:" + age);  
        System.out.println("College" + college);  
    }  
}
```

Program 3:- Sum of Two Number

```
import java.util.Scanner;  
class sum {  
    public static void main(String[] args)  
    {  
        Scanner sc = new Scanner(System.in);  
        int a, b, sum;  
        System.out.print("Enter first number:");  
        a = sc.nextInt();  
        System.out.print("Enter second number:");  
        b = sc.nextInt();  
        sum = a + b;  
        System.out.println("sum = " + sum);  
    }  
}
```
